

# Diamon-Fusion International®

## What is Diamon-Fusion®?

It is a patented chemical compound used by the US Army and Navy to protect windshields during combat and heavy use. The coating has won numerous awards and is licensed to companies all around the world. It bonds to the glass at the microscopic level and makes it 10 times more resistant to damage.

## What type of coverage does Diamon-Fusion® provide?

Coverage options range from 6 – 84 months and the dealer can choose between repellency, repair only, and repair and replace programs. We built these programs to meet every need of the dealership!

## How much does a dealer pay for the Diamon-Fusion® product?

There are two pricing options. There is a “Stand Alone” pricing option where the product (chemical) is paid for up front. The other option is an “All-Inclusive” pricing option where the cost of the chemical is included in the dealer cost, with no up-front costs to the dealer.

## What vehicles are eligible?

Any vehicle, regardless of age or manufacturer (except exotics), is eligible for coverage under the program. We also offer the same great coverage on RV's!

## Is the program available to eRate, eContract and eRemit?

There are a variety of eBusiness solutions available, including full DMS integration. Contact your NAE representative for complete details.
